Application/Control Number: 10/519,332

Art Unit: 1623

Claims 10-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 3, 2006.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 6, 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Margolis et al (U.S. Patent No. 6,514,979) in view of Harmenberg et al (U.S. Patent No. 5,571,798).

Margolis et al disclose the combination of abacavir with inosine momophosphate dehydrogenase inhibitors for the treatment of HIV but do not disclose the combination of abacavir with allowudine. Harmenberberg et al disclose allowudine for the treatment of HIV, it would have been prima facie obvious to a person having ordinary skill in the art at the time the claimed invention was made to combine abacavir with allowudine for the purpose of treating HIV.

Applicant's arguments filed May 29, 2007 have been fully considered but they are not persuasive.

Applicant contends that in the declaration filed May 29, 2007, Dr. Vrang concludes that the skilled practitioner, on reading the Harmenberg patent would not be motivated to extend the teachings of Harmenberg to another guanosine nucleoside.

Application/Control Number: 10/519,332

Art Unit: 1623

Page 3

Applicant's arguments and the declaration have been considered but have not been found persuasive since applicant has not presented evidence in verified form showing that the combination of abacavir and allowed in the range of the dosage claimed in claims 1, 6 and 7 results in a composition having synergistic results. From Example 2 on page 6 of the specification it is stated that at the ratio of 1:200 abacavir:allowed in the respective contributions of the two drugs becomes apparent and the synergy is measurable. However, the ratio of 1:200 is not commensurate with range of amounts claimed. Further, in order for the tests to be truly comparative, the amounts of each individual active ingredient should be the same as the total amount of the ingredients combined in the claimed composition.

With respect to claim 9, note that said claim is not limited to any amount of the active ingredients used and also reads on a pact comprising allowed alone or abacavir alone.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Application/Control Number: 10/519,332 Page 4

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
